Harassment and abuse is never acceptable.

This past week there have been incidents of City workers having shovels thrown at their vehicles and reports of toxic verbal harassment towards them and 311 operators.

These events impede on the safety and wellbeing of our colleagues, who are also friends, family members, and neighbours. Not only do these actions affect their individual lives, they threaten our community as a whole.

As Edmontonians, we must commit to civility, accountability and respectful dialogue. This takes all of us.

Honouring these principles daily will only enrich the City for the better. Let's work to make this happen.
